

FLAGLER (HMX59BS605)

Sweet corn with great yield potential

Relative maturity	77 days
Kernel color	bicolor
Endosperm	SH2
Ear length	8 in (20.5 cm)
Row count	16-18

FEATURES

- Good Disease package
- Excellent Yield
- Strong Plant
- Broad Adaptation
- Good stress tolerance

Disease resistance (HR = High Resistance, IR = Intermediate Resistance)

Rating	Common name	Abbreviation	Pathogen/Causal agent
IR	Common rust	Ps (Rp1-gfj)	<i>Puccinia sorghi</i>

Technical data and disease resistance ratings shown are averages of results from observations at various locations, under different conditions, and laboratory tests. It is not a prediction of future performance but a summary of past results. Seed performance, yield, and crop results will vary depending on geographic areas, environment conditions and pressure, field growing and management practices, and the presence of pests or pathogens. New, unknown, and/or atypical pathogen strains may overcome the resistance of the seed. Acceptance of the HM.CLAUSE Limitation of Warranty and Liability and Use Restriction, included with our seed packages or available at www.hmclause.com, is a condition of use of all our products.
